Software Engineer with Data Analytics Experience

(347) 485-2107 | corporan.jordy@gmail.com | GITHUB | LINKEDIN | PORTFOLIO

SKILLS

Programming Languages: Python, Javascript, SQL, HTML, CSS, VBA, Ruby

Frameworks / Tools: React, Redux, Node.js, Express.js, Socket.io, PostgreSQL, Jupyter notebook, AWS

HIGHLIGHTED PROJECTS

JMAX | (React / Redux, Express, Node. js, Mongo DB, Socket. io)

live | github

- Constructed a backend with **Express**, implementing RESTful APIs for CRUD operations, while MongoDB optimized data storage, retrieval, and update, resulting in a 50% faster response time
- Developed responsive wireframes for JMAX using CSS Flexbox and Grid, enhancing mobile compatibility by 80% and improving user interface
- Implemented AWS S3 bucket configurations and permissions to optimize image storage, reducing retrieval times by 30% and enhancing the user experience
- Solely integrated **Socket.io**, utilizing its event-driven architecture, to facilitate real-time user-to-user chats, designed to support potential scenarios of 1000+ concurrent conversations

GlueTube | (React / Redux, JavaScript, HTML, CSS)

live | github

- Spearheaded end-to-end integration of the frontend and backend, expertly employing React's useState and useEffect hooks for dynamic video rendering
- Crafted a multi-tiered commenting system using React components, with Redux's useDispatch enabling real-time state updates to facilitate active user interactions
- Engineered modular React components and harnessed Redux for efficient centralized state management, paving the way for streamlined development and easy scalability

WORK EXPERIENCE

Accounts Payable Analyst

Hudson Bay Capital Management LP

June 2021 - April 2023

- Consolidated cash activity and fixed asset data from QuickBooks into Excel, utilizing pivot tables and conditional formatting, aiding in a 15% quicker financial decision-making process
- Pioneered VBA macros to automate repetitive Excel tasks, achieving a 200% boost in productivity and saving 20 hours weekly
- Optimized vendor invoice workflows by integrating VBA tools, resulting in a 50% reduction in processing errors and a 20% quicker response time to vendors

EDUCATION

App Academy Immersive software engineering bootcamp focused on full-stack web development May 2023 - August 2023

• Relevant topics: Pair Programming, Object Oriented Programming, Responsive Design, Object-relational Mappers

CUNY: Bernard Baruch College Bachelor of Arts in Business Administration: Finance major | Philosophy minor May 2021
